INTRODUCING

DISTINCT TEACHING METHODOLOGY WITH AN UNIQUE APPROACH
TOWARDS SOLVING THE PROBLEM TO MAKE IT EASY

FROM THE DIRECTOR'S DESK

Learning has been the most fortifying and engaging experience of my life; teaching has been the most fulfilling. In the event that I make enough of an effort, I really trust that I could explain anything to anybody. Consistently I have a great time trying.

My love for Physics comes from the fact that I have always been a natural observer and have had this intense (sometimes destructive) curiosity to get to the roots of things. For me understanding on a logical level has been the safest and least demanding way to learn. My love for teaching comes from the fact that I love diversity; every student demands a new and different way of explaining things.

Something that works absolutely perfectly with one doesn't make a sense at all to the other, but there is some way hidden there which makes sense to the others. I love finding that. Witnessing that spark of realization on the face when someone actually visualizes what I am trying to show is my affection towards Physics.

My idea behind finding IMPULSE JEE is not just to push students for an over hyped energy into IIT/AIIMS or any other Engineering/Medical college (trust me it can be done without really knowing much about the subject) but to preach an attitude that derives the strength and the confidence from the common sense and logic.

One of my objectives, as an instructor, is to change the classroom from only a room where students come to take notes to a discussion forum where learning on the spot happens, where fearlessness is constructed and worked out, where individual associations with others are supported and created.

- Prakash Ranjan

ABOUT IMPULSE JEE

As Socrates said "I know that I don't know. But you don't know that you don't know, and that is why you think you know." Not knowing is dependably the specific initial step while in transit to knowing. "It's our view that happiness- or passionate knowledge, or adjust, or certainty, or confidence, or some other word for liking ourselves and our place in the world- is the establishment on which great lives and incredible accomplishments are fabricated. We want to develop cheerful children, caring individuals, individuals that will go out into the world and accomplish something great."

At IMPULSE JEE we generally urge students to ask questions. Environment we have made where-in, even a weaker student don't delay to ask their doubt. More you ask, more you learn is our educating design. Instead of following the regular educational modules, students here choose what they need to learn themselves, and seek after learning through involvement & experience. Teachers here go about as mentors and coaches for students, helping them figure out how to think autonomously. IMPULSE JEE center around training students how to learn about a subject or skill that interests them- and presenting them to a wide scope of subjects- as opposed to giving a particular set of information.

If we have to set the billiard ball into goal, we need to impart the ball in the right direction in short duration. Similarly if we have to set our student into their goal, we need to impart them in right direction in short duration.

This is what we call IMPULSE JEE, to achieve something we need to impart spark in mind in short duration, i.e your duration of learning with IMPULSE JEE.

OUR MISSION & VISION

" Where there is no vision, the people perish."

Regardless of what one's profession, one may contend that every one of us are instructors; that is, every one of us try to draw in others in something—carpentry, planting, science, reading, imparting—where the "something" regularly represents our enthusiasm and the subject of learning when we draw in others. What's our main mission, at that point, as we connect with or instruct somebody about our enthusiasm? As a teacher, it begins by being student-centric in every decision that I make to concentrate me on what is critical to each student. This encourages me focus my mission as an educator, to ensure students know I think about them and enhance student execution.

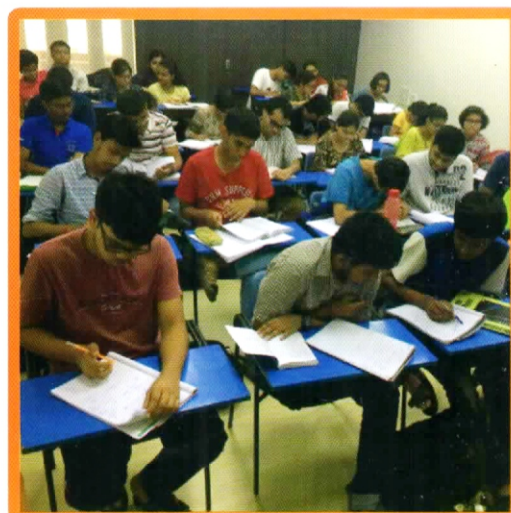

When we do this as instructors, we encourage students and youngsters become satisfied with what they need to feel successful and to do as such with companions. As our emphasis fixates on our students and building an association with them so we can bolster and engage them, we enable them to enhance student execution. That is our main vision as teachers when we share our enthusiasm for learning.

" Success is a state of mind set, if we do things with heart everything leads to success "

OUR MESSAGE FOR STUDENTS

All of physics is either impossible or trivial. It is impossible until we understand it, and then it becomes trivial. Physics needs more thinking. IQ varies from child to child so does the thinking ability. We should develop our IQ by thinking. Every child needs to understand that thinking is a continuous process to develop oneself. The path of development is tough but not impossible. It could be done by thinking itself. Development is the only way which leads to success. There is a huge gap which a student needs to fill between class X and class XI.

They flow in the motion of put the value get the result till class X. Physics is something more than this. Perhaps Its the nature. Everything that we imagine is physics, Even our daily life revolves around various theories of physics. Physics is all about the phenomena that happens in our practical life, and we need to know the concept beside such phenomena rather than just memorizing the things. The concept is what we guide a child to develop by emphasizing on the theory part and to develop imagination. To learn physics the quality and the various approaches with basic concepts to solve a particular problem is important.

OUR MESSAGE FOR PARENTS & GUARDIANS

Dear Parents & Guardians,

It is my pleasure to welcome you to **IMPULSE JEE**. The instructors and staff go along with me in saying we are cheerful to have you as a part of our training family. We know this will be a fruitful and fulfilling year for you. One of our greatest objectives for the year is to enable your kid to feel effective and accomplish scholarly brilliance. Here at **IMPULSE JEE** students has minimum or no doubts after attending our classes. By cooperating as parents, guardians and teachers, we can construct an establishment or deep rooted learning.

At **IMPULSE JEE** we take pride in our associations with parents, guardians, and consider you to be an accomplice in the vital activity of educating the children of this community. We respect your cooperation and support amid the guidance year. We anticipate celebrating with you the accomplishments of our students.

"Success is a state of mindset if we do things with heart everything leads to success"

YOUR SUCCESS IS OUR SUCCESS

☆ How We Contribute towards your Success ☆

- Students are trained in Subject by expert faculty from class X.
- Teaching method includes psychological inputs of the concepts from basic to the depth, efficient academic strategy which helps to cover the syllabus of all boards & all competitive exams respectively.
- Special Classes for KVPY
